1. This is the original webpage:

www.samnanger.kommune.no (the webpage is now got a new version.)

The prototype is about a webpage that has information of the Samnanger community. Users can find information about school and education, job opportunities, Samnanger policy among other themes. Users' need to have internet to access the webpage from device. It's possible to access from several device like computer, mobile or tablet.

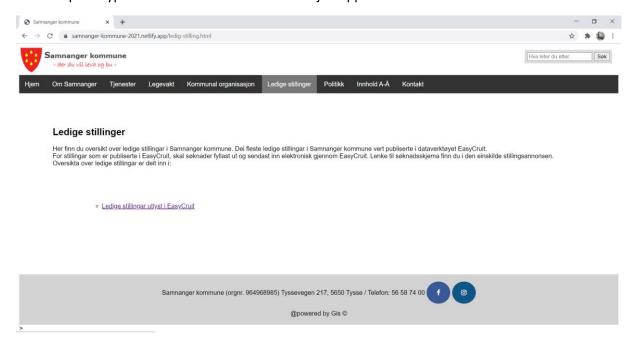

## The Hi-fi prototype:

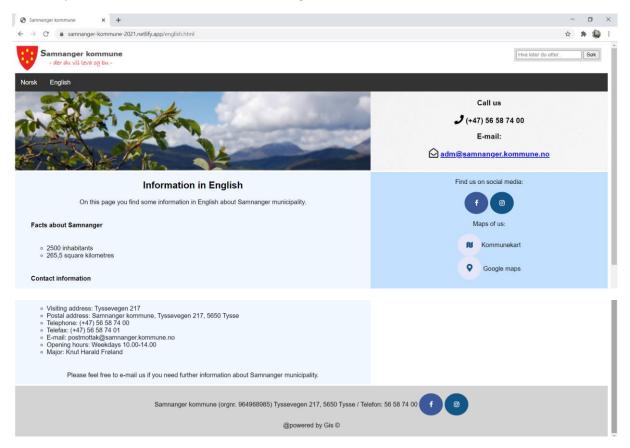

The design of hi-fi prototype was created in HTML, CSS and Javascript. The main menu bar has basically all information of the prototype. The original webpage is not so clear. The phone number was highlighted. Javascript was used to do the home section more interative: when user move mouse over the text "Kan vi hjelpe deg", a new text appear "Ring oss":

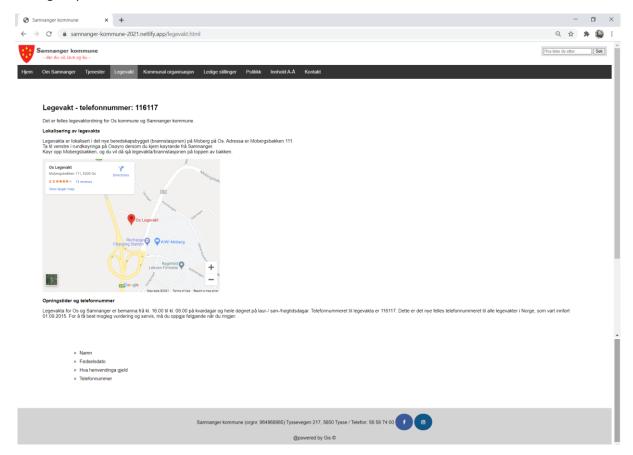

The hi-fi prototype from wireframe of how to find job opportunities:

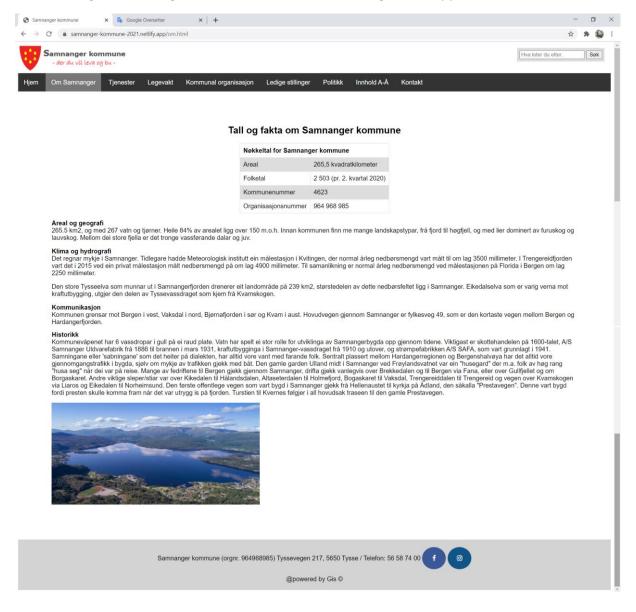

It is also possible to find some information in English:

Legevakt section show number of telephone and a map there people can easily find the way to get emergency medical care:

Om Samnanger section is general information about Samnanger municipy:

More details about the hi-fi prototype click here
